| 27. | a. more | b. less | c. as many as | d. fewer |
| 28. | a. destroy | b. clear | c. increase | d. defend |

۳

ب: متن زیر را بخوانید و به سؤالات به صورت خواسته شده پاسخ دهید.

Cheetahs and leopards are both big cats found in Africa and parts of Asia. They may look alike, but they are different in many ways.

Cheetahs are famous for their speed; they are actually the fastest land animals on the planet. Leopards are a little heavier than cheetahs. They are not as fast as cheetahs, but they are much more powerful. Cheetahs usually hunt during daytime. They often hunt small animals like gazelles and impalas. But they are not dangerous for humans. Leopards always hunt during the night. They are among the most dangerous animals for human beings, especially when they are injured. Cheetahs live between 8 and 10 years in the wild. Leopards live longer. They can live up to 17 years in the wild.

I. Is it True or False? (1)

29. Leopards and cheetahs always hunt at night.
30. Leopards live longer than cheetahs.

II. Choose the best answer. (1)

31. An injured leopard is a healthy one.
a. as dangerous as b. more dangerous than c. as powerful as d. more powerful than
32. The underlined word "they" in the second paragraph refers to
a. gazelles b. impalas c. cheetahs d. leopards

IV. Answer the following question. (1)

33. What does the cheetah usually hunt?
.....

Good Luck
